

Distribution of stressor-event links according to the 7 most common events, representing 100% of the total data set (7 distinct events and 1036 links)

#1 : Activation AhR
#2 : Activation CYP1A2
#3 : Induction CYP1A2
#4 : Uroporphyrin
#5 : Uroporphyrinogen oxidation
#6 : Inhibition uroporphyrinogen decarboxylase
#7 : Highly carboxylated porphyrins accumulation
